

CRUISE CONTROL MECCANICO, SICURO E INTUITIVO

Kaoko nasce nel 2001 in Sud Africa dopo che il proprietario, Roy Mentis, durante un viaggio in Namibia, ha testato un serbatoio di grandi dimensioni di propria produzione, riscontrando allo stesso tempo un notevole affaticamento del polso per le lunghe ore in sella.

Il meccanismo prevede una **rotella dentata** che, ruotata dopo essere stata attivata, applica una resistenza alla rotazione dell'acceleratore e libera dalla tensione la mano e il polso. Allo stesso tempo **non crea alcun pericolo** perché il comando del gas rimane sempre nelle mani del pilota che può chiuderlo in un attimo con la rotazione inversa della mano. Kaoko applica solamente un attrito al comando dell'acceleratore e non lo blocca completamente. L'acceleratore può sempre essere aperto o chiuso anche quando il controllo è completamente inserito.

Lo stabilizzatore manubrio Kaoko è rinomato in tutto il mondo per la sua semplicità e per l'alta qualità. Può rendere più confortevole gli spostamenti quotidiani, infatti può essere attivato anche a bassa velocità, ed è perfetto nei viaggi lunghi quando bisogna mantenere il gas aperto per periodi di tempo estesi. Tutti i Kaoko sono **specifici** per moto e realizzati con materiali dei più alti standard ingegneristici.

Dal Sud Africa, Kaoko arriva in Italia grazie a Forbikes che è felice di curarne la distribuzione nel nostro paese.

CODICE	MODELLO
KA-LSL13.75	MANUBRI AFTERMARKET LSL, PRO-TAPER, MAGURA & SPIEGLER O ALTRI MANUBRI CON DIAM.INTERNO 14MM. PREGO CHIEDERE INFO VIA EMAIL CON IL MODELLO DI MOTO E ANNO.
KA-RIZ28.5	MANUBRI RIZOMA E MIRROR E CON/SENZA TERMINALI MANUBRIO. ARTICOLO SPECIALE, PREGO INVIARE MAIL CON RICHIESTA DETTAGLI COMPLETI PRIMA DI ORDINARE.
